Cancer Letters, 58 (1991) 255–259
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 58

Adrenocroticotropic hormone, stress, immunity, T lymphocytes, blastic response, alprazolam, anxiolytics, 183
Agaricus bisporis, carcinogenicity, agaritine, Ames' test, *Cortinellus shiitake*, 87
Agaritine, *Agaricus bisporis*, carcinogenicity, Ames' test, *Cortinellus shiitake*, 87
Alkylchrysene diol epoxides, tumorigenicity, newborn mice, 115
Alprazolam, stress, immunity, T lymphocytes, blastic response, anxiolytics, adrenocroticotropic hormone, 183
Ames' test, *Agaricus bisporis*, carcinogenicity, agaritine, *Cortinellus shiitake*, 87
Aminoacyl-tRNA synthetase, MPC-11 cells, tumor, Krebs II ascites, aminoacyl-tRNA synthetase phosphatase, cyclic AMP, 119
Aminoacyl-tRNA synthetase phosphatase, MPC-11 cells, tumor, Krebs II ascites, aminoacyl-tRNA synthetase, cyclic AMP, 119
Amino acids, liver, Ehrlich ascites tumour, 221
Antioxidants, rat prostate carcinogenesis, 3,2-dimethyl-4-aminobiphenyl, modification, 241
Anxiolytics, stress, immunity, T lymphocytes, blastic response, alprazolam, adrenocroticotropic hormone, 183

Betel quid ingredients, clastogen, caudal sperms, germ cells, 161
Biflavonoid, lophirone A, tumor-promotion inhibitor, Epstein-Barr virus-activation inhibitor, inflammation-inhibitor, PKC activation-inhibitor, 101
Blastic response, stress, immunity, T lymphocytes, alprazolam, anxiolytics, adrenocroticotropic hormone, 183
Breast cancer, thyroid cancer, breast tumor antigen, thyroglobulin, thyroperoxidase, 125
Breast cancer serum antigen, breast epithelial mucin, breast epithelial mucin serum clearance, 65
Breast cells, T47D, platelet derived growth factor, MCF-7, 137
Breast epithelial mucin, breast cancer serum antigen, breast epithelial mucin serum clearance, 65
Breast epithelial mucin serum clearance, breast epithelial mucin, breast cancer serum antigen, 65
Breast tumor antigen, breast cancer, thyroid cancer, thyroglobulin, thyroperoxidase, 125
N-Butyl-*N*-(4-hydroxybutyl)nitrosamine, rat, urinary bladder, renal pelvis, carcinogenesis, uracil, 81

c-*myc*, *N*-methyl-*N*-nitro-*N*-nitrosofuanidine, c-*neu*, rat lung epithelial cells, DNA damage, DNA repair, 57
c-*neu*, *N*-methyl-*N*-nitro-*N*-nitrosofuanidine, c-*myc*, rat lung epithelial cells, DNA damage, DNA repair, 57
Cancer, polyamines, ornithine decarboxylase, tumor burden, 155
Carcinogenesis, rat, urinary bladder, renal pelvis, uracil, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, 81
Carcinogenicity, *Agaricus bisporis*, agaritine, Ames' test, *Cortinellus shiitake*, 87
Carcinoid of the lung, human chorionic gonadotropin, non-small cell lung cancer, small cell lung carcinoma, 145
Caudal sperms, clastogen, germ cells, betel quid ingredients, 161
Cervical cancer, glycoproteins, oncofoetal, organ culture, concanavalin A, 247
Clastogen, caudal sperms, germ cells, betel quid ingredients, 161
Clearance, *N*-nitrosodimethylamine metabolism, enzymatic demethylation, methylamine, pharmacokinetics, 1
Clonogenic cells, differentiated cells, ovarian cancer, density gradient centrifugation, 7
Concanavalin A, glycoproteins, cervical cancer, oncofoetal, organ culture, 247
Copper – ATP complex, glutaminase, Ehrlich ascites tumor, Cu – ATP therapy, mouse liver, 151
Cortinellus shiitake, *Agaricus bisporis*, carcinogenicity, agaritine, Ames' test, 87
Cu – ATP therapy, glutaminase, Ehrlich ascites tumor, copper – ATP complex, mouse liver, 151
Cyclic AMP, MPC-11 cells, tumor, Krebs II ascites, aminoacyl-tRNA synthetase phosphatase, aminoacyl-tRNA synthetase, 119
Cysteine, glutathione, oxidative stress, 8-hydroxydeoxyguanosine, ferric nitrilotriacetate, 49

Density gradient centrifugation, clonogenic cells, differentiated cells, ovarian cancer, 7
Diethylnitrosamine, prophyria, hexachlorobenzene, hepatocarcinoma, porphyrins, 225
Diethylstilbestrol, neonatal treatment, female genital organs, mice, epidermal growth factor, 167
Differentiated cells, clonogenic cells, ovarian cancer, density gradient centrifugation, 7
3,2-dimethyl-4-aminobiphenyl, rat prostate carcinogenesis, antioxidants, modification, 241
7,12-dimethylbenz[aanthracene, poly(A)polymerase, mammary tumor, 195
DNA adducts, 3-methoxy-4-aminoazobenzene, 2-methoxy-4-aminoazobenzene, hepatocarcinogen, rat liver, 32^{32}-post-labelling analysis, 199
DNA damage, *N*-methyl-*N*-nitro-*N*-nitrosofuanidine, c-*neu*, c-*myc*, rat lung epithelial cells, DNA repair, 57
DNA damage, quercetin, flavonoids, lipid peroxidation, oxygen radical, 75
DNA repair, *N*-methyl-*N*-nitro-*N*-nitrosofuanidine, c-*neu*, c-*myc*, rat lung epithelial cells, DNA damage, 57

Ehrlich ascites tumor, glutaminase, copper – ATP complex, Cu – ATP therapy, mouse liver, 151
Ehrlich ascites tumour, amino acids, liver, 221
Enzymatic demethylation, *N*-nitrosodimethylamine metabolism, methylamine, pharmacokinetics, clearance, 1
Epidermal growth factor, diethylstilbestrol, neonatal treatment, female genital organs, mice, 167
Epstein-Barr virus-activation inhibitor, lophirone A, biflavonoid, tumor-promotion inhibitor, inflammation-inhibitor, PKC activation-inhibitor, 101

Fale genital organs, diethylstilbestrol, neonatal treatment, mice, epidermal growth factor, 167
Ferric nitrilotriacetate, glutathione, cysteine, oxidative stress, 8-hydroxydeoxyguanosine, 49
Flavonoids, quercetin, DNA damage, lipid peroxidation, oxygen radical, 75
Fluorescence microscopy, photodynamic therapy, Photofrin II, phthalocyanines, localization, image analysis, melanoma, 37

Gastric tumor, K-*ras*, point mutation, 107
Germ cells, clastogen, caudal sperms, betel quid ingredients, 161
Glucocorticoids, growth regulation, rat hepatoma cells, insulin, 211
Glucose, photodynamic therapy, Photofrin II, glycolysis, glycolysis inhibitor, nordihydroguaiaretic acid, 29
Glutaminase, Ehrlich ascites tumor, copper – ATP complex, Cu – ATP therapy, mouse liver, 151
Glutathione, cysteine, oxidative stress, 8-hydroxydeoxy guanosine, ferric nitrilotriacetate, 49
Glycolysis, photodynamic therapy, Photofrin II, glucose, glycolysis inhibitor, nordihydroguaiaretic acid, 29
Glycolysis inhibitor, photodynamic therapy, Photofrin II, glucose, glycolysis, nordihydroguaiaretic acid, 29
Glycoproteins, cervical cancer, oncofoetal, organ culture, concanavalin A, 247
Growth regulation, glucocorticoids, rat hepatoma cells, insulin, 211

Hepatocarcinogen, 3-methoxy-4-aminoazobenzene, 2-methoxy-4-aminoazobenzene, DNA adducts, rat liver, ^{32}-post-labelling analysis, 199
Hepatocarcinoma, prophyria, hexachlorobenzene, diethylnitrosamine, porphyrins, 225
Hexachlorobenzene, prophyria, hepatocarcinoma, diethylnitrosamine, porphyrins, 225
Human chorionic gonadotropin, non-small cell lung cancer, small cell lung carcinoma, carcinoid of the lung, 145
8-Hdroxydeoxyguanosine, glutathione, cysteine, oxidative stress, ferric nitrilotriacetate, 49

Image analysis, photodynamic therapy, Photofrin II, phthalocyanines, localization, fluorescence microscopy, melanoma, 37
Iimmunity, stress, T lymphocytes, blastic response, alprazolam, anxiolytics, adrenocroticotropic hormone, 183
Immunoassay, urokinase-type plasminogen activator, nasopharyngeal carcinoma, serological test, sodium dodecyl sulphate, 233
Inflammation-inhibitor, lophirone A, biflavonoid, tumor-promotion inhibitor, Epstein-Barr virus-activation inhibitor, PKC activation-inhibitor, 101
Insulin, glucocorticoids, growth regulation, rat hepatoma cells, 211
In vitro, rTNF, rIFNα. rIFNγ, mesothelioma, 205

K-*ras*, gastric tumor, point mutation, 107
Krebs II ascites, MPC-11 cells, tumor, aminoacyl-tRNA synthetase phosphatase, aminoacyl-tRNA synthetase, cyclic AMP, 119

Laser scan microscopy, photodynamic therapy, photosensitizer, localization, melanoma, nude mice, 17
Leukemia, poly ADPR transferase, tumour promoters, malignant ovarian tumours, NAD, lymphocytes, 131
Lipid peroxidation, quercetin, flavonoids, DNA damage, oxygen radical, 75
Liver, amino acids, Ehrlich ascites tumour, 221

Liver tumors, neonatal mice, lung tumors, tobacco-specific nitrosamine, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, 177
Localization, photodynamic therapy, Photofrin II, phthalocyanines, fluorescence microscopy, image analysis, melanoma, 37
Localization, photodynamic therapy, photosensitizer, melanoma, nude mice, laser scan microscopy, 17
Lophirone A, biflavonoid, tumor-promotion inhibitor, Epstein-Barr virus-activation inhibitor, inflammation-inhibitor, PKC activation-inhibitor, 101
Lung tumors, neonatal mice, liver tumors, tobacco-specific nitrosamine, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, 177
Lymphocytes, poly ADPR transferase, tumour promoters, leukemia, malignant ovarian tumours, NAD, 131

Malignant ovarian tumours, poly ADPR transferase, tumour promoters, leukemia, NAD, lymphocytes, 131
Mammary tumor, poly(A)polymerase, 7,12-dimethylbenz[αanthracene, 195
Market analysis, sialic acid, serum, tumor, 91
MCF-7, breast cells, T47D, platelet derived growth factor, 137
Melanoma, photodynamic therapy, Photofrin II, phthalocyanines, localization, fluorescence microscopy, image analysis, 37
Melanoma, photodynamic therapy, photosensitizer, localization, nude mice, laser scan microscopy, 17
Mesothelioma, rTNF, rIFNα. rIFNγ, in vitro, 205
Metabolism, *N*-nitrosodimethylamine enzymatic demethylation, methylamine, pharmacokinetics, clearance, 1
3-methoxy-4-aminoazobenzene, 2-methoxy-4-aminoazobenzene, hepatocarcinogen, DNA adducts, rat liver, ^{32}-post-labelling analysis, 199
3-methoxy-4-aminoazobenzene, 2-methoxy-4-aminoazobenzene, hepatocarcinogen, DNA adducts, rat liver, ^{32}-post-labelling analysis, 199
N-methyl-*N*-nitro-*N*-nitrosofuanidine, c-*neu*, c-*myc*, rat lung epithelial cells, DNA damage, DNA repair, 57
Methylamine, *N*-nitrosodimethylamine metabolism, enzymatic demethylation, pharmacokinetics, clearance, 1
4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone, neonatal mice, liver tumors, lung tumors, tobacco-specific nitrosamine, 177
Mice, diethylstilbestrol, neonatal treatment, female genital organs, epidermal growth factor, 167
Modification, rat prostate carcinogenesis, 3,2-dimethyl-4-aminobiphenyl, antioxidants, 241
Mouse leukemia, strong immunogenicity, spontaneous cure, relapse, tumor dormancy, 69
Mouse liver, glutaminase, Ehrlich ascites tumor, copper – ATP complex, Cu – ATP therapy, 151
MPC-11 cells, tumor, Krebs II ascites, aminoacyl-tRNA synthetase phosphatase, aminoacyl-tRNA synthetase, cyclic AMP, 119
Multi-drug resistance, protein kinase C, protein phosphorylation, phorbol esters, 189

NAD, poly ADPR transferase, tumour promoters, leukemia, malignant ovarian tumours, lymphocytes, 131
Nasopharyngeal carcinoma, urokinase-type plasminogen activator, immunoassay, serological test, sodium dodecyl sulphate, 233
Neonatal mice, liver tumors, lung tumors, tobacco-specific nitrosamine, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, 177
Neonatal treatment, diethylstilbestrol, female genital organs, mice, epidermal growth factor, 167
newborn mice, alkylchrysene diol epoxides, tumorigenicity, 115
N-nitrosodimethylamine metabolism, enzymatic demethylation, methylamine, pharmacokinetics, clearance, 1
Non-small cell lung cancer, human chorionic gonadotropin, small cell lung carcinoma, carcinoid of the lung, 145
Nordihydroguaiaretic acid, photodynamic therapy, Photofrin II, glucose, glycolysis, glycolysis inhibitor, 29
Nude mice, photodynamic therapy, photosensitizer, localization, melanoma, laser scan microscopy, 17

Oncofoetal, glycoproteins, cervical cancer, organ culture, concanavalin A, 247
Organ culture, glycoproteins, cervical cancer, oncofoetal, concanavalin A, 247
Ornithine decarboxylase, polyamines, cancer, tumor burden, 155
Ovarian cancer, clonogenic cells, differentiated cells, density gradient centrifugation, 7
Oxidative stress, glutathione, cysteine, 8-hydroxydeoxyguanosine, ferric nitrilotriacetate, 49
Oxygen radical, quercetin, flavonoids, DNA damage, lipid peroxidation, 75

Pharmacokinetics, *N*-nitrosodimethylamine metabolism, enzymatic demethylation, methylamine, clearance, 1
Phorbol esters, protein kinase C, multi-drug resistance, protein phosphorylation, 189
Photodynamic therapy, Photofrin II, phthalocyanines,

localization, fluorescence microscopy, image analysis, melanoma, 37
Photodynamic therapy, Photofrin II, glucose, glycolysis, glycolysis inhibitor, nordihydroguaiaretic acid, 29
Photodynamic therapy, photosensitizer, localization, melanoma, nude mice, laser scan microscopy, 17
Photofrin II, photodynamic therapy, phthalocyanines, localization, fluorescence microscopy, image analysis, melanoma, 37
Photofrin II, photodynamic therapy, glucose, glycolysis, glycolysis inhibitor, nordihydroguaiaretic acid, 29
Photosensitizer, photodynamic therapy, localization, melanoma, nude mice, laser scan microscopy, 17
Phthalocyanines, photodynamic therapy, Photofrin II, localization, fluorescence microscopy, image analysis, melanoma, 37
PKC activation-inhibitor, lophirone A, biflavonoid, tumor-promotion inhibitor, Epstein-Barr virus-activation inhibitor, inflammation-inhibitor, 101
Platelet derived growth factor, breast cells, T47D, MCF-7, 137
Point mutation, gastric tumor, K-*ras*, 107
Poly(A)polymerase, 7,12-dimethylbenz[αanthracene, mammary tumor, 195
Polyamines, ornithine decarboxylase, cancer, tumor burden, 155
Poly ADPR transferase, tumour promoters, leukemia, malignant ovarian tumours, NAD, lymphocytes, 131
32^{32}-post-labelling analysis, 3-methoxy-4-aminoazobenzene, 2-methoxy-4-aminoazobenzene, hepatocarcinogen, DNA adducts, rat liver, 199
Prophyria, hexachlorobenzene, hepatocarcinoma, diethylnitrosamine, porphyrins, 225
Porphyrins, prophyria, hexachlorobenzene, hepatocarcinoma, diethylnitrosamine, 225
Protein kinase C, multi-drug resistance, protein phosphorylation, phorbol esters, 189
Protein phosphorylation, protein kinase C, multi-drug resistance, phorbol esters, 189

Quercetin, flavonoids, DNA damage, lipid peroxidation, oxygen radical, 75

Rat, urinary bladder, renal pelvis, carcinogenesis, uracil, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, 81
Rat hepatoma cells, glucocorticoids, growth regulation, insulin, 211
Rat liver, 3-methoxy-4-aminoazobenzene, 2-methoxy-4-aminoazobenzene, hepatocarcinogen, DNA adducts, 32^{32}-post-labelling analysis, 199
Rat lung epithelial cells, *N*-methyl-*N*-nitro-*N*-nitrosofuanidine, c-*neu*, c-*myc*, DNA damage, DNA repair, 57
Rat prostate carcinogenesis, 3,2-dimethyl-4-aminobiphenyl, antioxidants, modification, 241
Relapse, mouse leukemia, strong immunogenicity, spontaneous cure, tumor dormancy, 69
Renal pelvis, rat, urinary bladder, carcinogenesis, uracil, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, 81
rIFNα. rTNF, rIFNγ, mesothelioma, in vitro, 205
rIFNγ, rTNF, rIFNα. mesothelioma, in vitro, 205
rTNF, rIFNα. rIFNγ, mesothelioma, in vitro, 205

Serological test, urokinase-type plasminogen activator, nasopharyngeal carcinoma, immunoassay, sodium dodecyl sulphate, 233
Serum, sialic acid, tumor, market analysis, 91
Sialic acid, serum, tumor, market analysis, 91
Small cell lung carcinoma, human chorionic gonadotropin, non-small cell lung cancer, carcinoid of the lung, 145
Sodium dodecyl sulphate, urokinase-type plasminogen activator, nasopharyngeal carcinoma, immunoassay, serological test, 233
Spontaneous cure, mouse leukemia, strong immunogenicity, relapse, tumor dormancy, 69
Stress, immunity, T lymphocytes, blastic response, alprazolam, anxiolytics, adrenocroticotropic hormone, 183
Strong immunogenicity, mouse leukemia, spontaneous cure, relapse, tumor dormancy, 69

T47D, breast cells, platelet derived growth factor, MCF-7, 137
Thyroglobulin, breast cancer, thyroid cancer, breast tumor antigen, thyroperoxidase, 125
Thyroid cancer, breast cancer, breast tumor antigen, thyroglobulin, thyroperoxidase, 125
Thyroperoxidase, breast cancer, thyroid cancer, breast tumor antigen, thyroglobulin, 125
Tobacco-specific nitrosamine, neonatal mice, liver tumors, lung tumors, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, 177
Tumor, MPC-11 cells, Krebs II ascites, aminoacyl-tRNA synthetase phosphatase, aminoacyl-tRNA synthetase, cyclic AMP, 119
Tumor, sialic acid, serum, market analysis, 91
Tumor-promotion inhibitor, lophirone A, biflavonoid, Epstein-Barr virus-activation inhibitor, inflammation-inhibitor, PKC activation-inhibitor, 101
Tumorigenicity, alkylchrysene diol epoxides, newborn mice, 115
Tumor burden, polyamines, ornithine decarboxylase, cancer, 155

Tumor dormancy, mouse leukemia, strong immunogenicity, spontaneous cure, relapse, 69
Tumour promoters, poly ADPR transferase, leukemia, malignant ovarian tumours, NAD, lymphocytes, 131
T lymphocytes, stress, immunity, blastic response, alprazolam, anxiolytics, adrenocroticotropic hormone, 183
Uracil, rat, urinary bladder, renal pelvis, carcinogenesis, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, 81
Urinary bladder, rat, renal pelvis, carcinogenesis, uracil, *N*-butyl-*N*-(4-hydroxybutyl)nitrosamine, 81
Urokinase-type plasminogen activator, nasopharyngeal carcinoma, immunoassay, serological test, sodium dodecyl sulphate, 233
